

HCI Deployment for Leading Indian Pharmaceutical Company and the World's Largest Producer of Anti-Retroviral Drugs by Redington

Introduction

How Redington implemented HCI for leading Indian pharmaceutical company and the world's largest producer of anti-retroviral drugs.

About Client

The customer is an India's largest pharmaceutical company and the world's largest producer of anti-retroviral drugs. It is also among the world's leading producers of key Active Pharmaceutical Ingredients with presence in 145+ countries and backed by 30 years of experience in the pharma sector

Business Challenges

Customer wanted to have a complete infrastructure consolidation for its Drugs and Pharma data analysis

Customer has stipulated timelines and all the infra with 4 different locations with 16 nodes deployment

Workloads included front end applications with Backend SQL and proprietary Pharma and Drug analysis VM

Redington's Implementation Service & Benefits to the customer

- Infra consisted of 16 Vxrail E560 nodes HCI with TOR Ethernet switches
- The deployment for the entire HCI architecture was completed with TOR installation in 4 days
- Helped the Customer Team for creation of applications and Databases with migration of workloads
- Demonstrated High availability of data and the necessary features like Live vmotion/HA/DRS
- Appreciation for the same from customer

Result

- Implementation completed successfully
- A complete product training and analysis was provided to the customer
