

## Redington Powers MXDR Growth with Microsoft at GISEC Global

**Dubai, United Arab Emirates, 6<sup>th</sup> May 2025** – Redington, a leading technology aggregator and innovation powerhouse across emerging markets, today announced the expansion of its Managed Extended Detection and Response (MXDR) Solution based on Microsoft Sentinel and Defender, supported through its robust partner network at GISEC Global 2025. This milestone enables Redington and its partners to help customers address evolving security challenges with comprehensive, ready-to-deploy managed services.

With the full solution stack now live on the Azure Marketplace, Redington is actively onboarding customers through its channel ecosystem. The offering is delivered via DigiGlass, Redington’s managed security services practice and now brings advanced Azure Sentinel-based solutions to market.

Redington’s expanded MXDR capabilities open new opportunities for partners, especially those without their own Security Operations Center (SOC) practices, to deliver managed security services seamlessly to their customers. Through this model, partners can leverage Redington’s expertise and DigiGlass capabilities to offer end-to-end security coverage — giving customers peace of mind and allowing them to focus on innovation and growth.

“The expansion of our MXDR solution, built on Microsoft Sentinel and Defender, marks a significant milestone in Redington’s mission to democratize advanced cybersecurity across the region,” said **Nehal Sharma, Vice President, Cloud Solutions Group, Redington**. “With our solution stack now live on the Azure Marketplace, we’re enabling our partners — particularly those without in-house SOC capabilities — to deliver powerful, end-to-end managed security services to their customers. This is about empowering businesses to navigate today’s complex threat landscape with confidence, so they can focus on driving innovation and growth.”

As part of this launch, Redington will showcase its expanded MXDR offering at GISEC Global 2025, alongside key Microsoft partners including noventiq, Exquitech, and IDC Technologies.

Visitors can explore Redington’s booth in Hall 4, Stand J10 to see live demos, learn more about the solutions, and engage with the Redington and DigiGlass teams.
