

Array Networks Partners with Redington to Enhance Market Reach in the Middle East and Africa (MEA) Region

Dubai, United Arab Emirates, 25th July, 2024 – [Array Networks](#), leader in application security products, today announced their strategic partnership with Redington, the leading technology aggregator and innovation powerhouse across emerging markets. Through this collaboration Redington will extend Array's APV Series Application Delivery Controller, Web Application Firewall, AVX Series Network hyperconverged Infrastructure and range of security solutions to its customers across the MEA region.

As cyber threats continue to evolve, businesses are increasingly seeking advanced security measures to protect their applications. This partnership enables Array Networks to leverage Redington's extensive market presence and deep understanding of local needs to deliver tailored security solutions to reach new customers addressing the unique challenges faced by organizations in the Middle East and Africa accelerating its regional growth.

Shibu Paul - VP International Sales at Array Networks

“We are excited to announce our partnership with Redington in the Middle East and Africa. As we plan to expand our regional footprint, this collaboration marks a significant milestone for both organizations, allowing us to combine our strengths to deliver enhanced security solutions to our customers. Together, we aim to drive innovation and strengthen our commitment of being the most valued technology enablers empowering businesses with the right security tools they need to thrive in today's digital landscape,” said, **Shibu Paul - VP International Sales at Array Networks.**

He further added, "Array Networks serves as a stalwart guardian of the digital infrastructure, ensuring resilience and sustainability for organizations offering a seamless, comprehensive defense against challenging cyber threats."

Redington will enhance its portfolio by integrating Array Networks' innovative network and security solutions. This strategic move will enable Redington to provide a more comprehensive suite of highly validated and user-friendly security offerings to its customers and partners throughout the MEA region.

Using Array's high-performance and secure application delivery solutions, organizations can ensure availability, security, remote access, SSL visibility from any platform, application and business.

Dharshana Kosgalage, Executive Vice President, Technology Solutions Group, Redington Middle East and Africa

Dharshana Kosgalage, Executive Vice President, Technology Solutions Group, Redington Middle East and Africa, said, "We are thrilled to partner with Array Networks to strengthen our security portfolio. Array's robust and innovative solutions perfectly complement our existing suite of offerings, enabling us to deliver comprehensive and effective security solutions to our channel ecosystem to help customers secure their digital assets across the MEA region. Their deep expertise in application delivery and security, coupled with our extensive market reach, will undoubtedly create notable value for our

partners and end-users. We are confident that this collaboration will drive growth and success for both organizations."

Through this mutually beneficial partnership, both companies empower organizations to better protect their digital assets and respond effectively to emerging threats, thereby fostering a safer digital environment.

Array offers a complete range of application delivery and security solutions aimed at maximizing employee productivity, ensuring always-on availability, optimizing the end-user experience, and guarding business infrastructure against attack and data leakage. For over two decades, Array has pioneered advances in integrated traffic management and secure application-level communications, setting new standards for innovation, quality, price-performance, and commitment to customer service and customer satisfaction.
