Formulae for calculation of ratios are as follows:

- (a) Debt service coverage ratio = (Profit/(loss) before tax Dividend income + Interest expenses) / (Interest expenses + Repayment of Long-term loans during the year) For the purpose of calculation, loans having original maturity of more than 360 days are considered as Long-term loans.
- (b) Interest service coverage ratio\* = (Profit/(loss) from ordinary activities before tax Dividend income + Interest expenses – Interest income earned on surplus funds) / (Interest expenses – Interest income earned on surplus funds).
- (c) Debt equity ratio\*\* = (Total debt Cash and cash equivalents Short term investments) / (Total equity Investments in subsidiaries)
- (d) Net worth = Equity share capital + Other equity
- (e) Current ratio = Current assets / Current liabilities
- (f) Current liabilities ratio = Current liabilities / Total liabilities
- (g) Long term debt to Working capital = Long term borrowings (including current portion of long-term borrowings) / Working capital Working capital = Current assets (excluding Assets classified as held for sale) - Current liabilities
- (excluding current maturities of long term debt, interest accrued on borrowings).

  (h) Bad debts to Accounts receivable ratio = Bad debts / Trade receivables
- (i) Total debts to Total assets ratio = (Non-current borrowings + Current borrowings) / Total assets
- Debtors turnover ratio (number of times) (annualized) = Revenue from operations / Average Trade receivables
- (k) Inventory turnover ratio (number of times) (annualized) = (Purchases of traded goods + Changes in inventories of traded goods) / Average Inventories
- (I) Operating margin (%) = (Profit before tax + Finance costs Dividend income) / Revenue from operations
- (m) Net profit margin (%) = Net profit after tax excluding dividend income / Revenue from operations \* Since interest income has been obtained from surplus funds, the same has been adjusted with interest expense for interest service coverage ratio computation.
- \*\* Debt equity ratio negative means excess Cash and cash equivalents over Total debt.
